Course: Astrochemistry

Lecturers: S. Schlemmer, P. Schilke
Email: schlemmer@ph1.uni-koeln.de, schilke@ph1.uni-koeln.de

Requirements for participation:
Atomic Physics, Molecular Physics and Quantum Mechanics at the level of the bachelor courses in physics, Molecular Physics I

Type of module examinations:
One oral examination at the end of the module

Duration of the course:
1 semester

Aims of the course:
The lecture introduces to astrochemistry of various astrophysical environments. Fundamental processes, such as molecular collisions, fragmentations, and chemical reactions, are explained, and implications for astrophysical observations by means of high resolution spectroscopy are treated.

Contents of the course:
- Detection of Molecules in Space
- Elementary Chemical Processes
- Chemical Networks
- Grain Formation (Condensation)
- Properties of Grains and Ice
- Grain Chemistry
- Diffuse Clouds, Shocks, Dark Clouds, Star Forming Regions
